

Skyline Brilliance

Individual Design of Glass Components

A number of options are available for the devices of the Skyline Brilliance series, so that the panels can be individually tailored to your needs.

COLOUR TONE OF THE GLASS COMPONENTS

You decide which colour tone the glass components of the devices should have (standard: Jet black RAL 9005). For this, you have a choice of colour variants, which you can see on the following page. If you wish to have a different RAL-tone, an extra charge will be made.

COLOUR TONE OF THE PLASTIC FRAME

For the plastic frame for mounting the glass components you can choose between the colours black (RAL 9004) and white (RAL 9016).

ICONS OF THE TOUCH PANELS

For the touch panels HC3506 and HC3512 you can choose between different icons. Depending on what you want to switch via the panels, different types of lamps, displays (DND - Do not disturb), shutters, door opening, etc. are available.

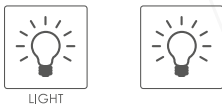

ICONS WITH / WITHOUT TOUCH FIELD LIMITATION

Select whether the icons of the touch panels should be displayed with touch field limitation or without.

ICONS WITH / WITHOUT FUNCTION DESIGNATION

Also select whether the icons should be displayed with or without function designation.

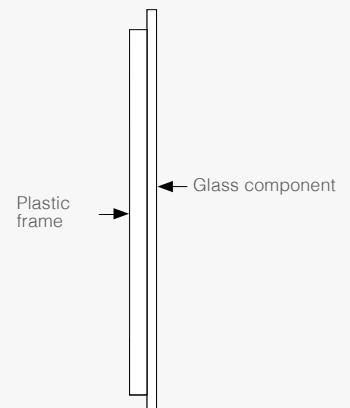

COLOUR TONE OF THE TOUCH FIELD ILLUMINATION

When individual touch fields are activated, they are illuminated in colour. Decide which fields should be illuminated in which colour. The colours white, red, green and blue are available.
